---

Dear city leaders,

I am an avid cyclist and resident of Sebastopol along the Joe Rodota trail. I don't agree with the recommendation to replace the bike lanes with sharrows. I think the sharrows will discourage the less experienced bicyclists from riding on Morris Street and potentially take much less safe roads like highway 116. The bike lanes on Morris Street provide a connection to Joe Radota trail, the community center and to West County High School.

Please keep the Class II bike lanes.

I agree with the proposed option 2:

- keeping the bike lanes, removing parking on one side of the street and widening the remaining parking lane. Another option would be to move the RV encampment

Thank you for your consideration.
