---

Dear Sebastopol City Council Members,

I'm writing you in strong opposition to smart water meters in our town. I'm one of many citizens with sensitivities to EMFs and radiation toxicity that these smart water meters will surely emit. Many Sebastopol residents have already had serious adverse health events resulting from the cell tower located by the hospital and I've noticed several other cell towers in town.

Installing over 3000 smart meters guaranteed to emit harmful EMFs and radiation is just not worth the risks to human health. Our elderly and our children deserve better. Also please explain how this would have any benefit whatsoever on the people, the tax payers, of our town. It has none!

Save our water meters!

No on smart meters!

Sincerely,

Erin Saunders

To Sebastopol City Council Members:

I am writing in strong opposition of Smart Water Meters. Anyone who doesn't see the problems with Smart Water Meters isn't looking closely or perhaps broadly enough. Controlling water is cruel and inhumane. Harming water with radiation is even more cruel and it opens the way for a kind of harmful control of people and our bodies.

In addition to harmful and unknown effects caused by Smart Meters, the cost is extreme and I'm horrified the City Council would even begin to entertain such a plan. No with the Smart Water Meters. Electromagnetic radiation is increasing and impacts our health and well being. As it is, many, many of our friends and families live every day with mystery

illnesses. We cannot necessarily know or track the impact of radiation and EMFs. The harmfulness is not often validated and yet, individuals suspect and report health issues when in proximity to excessive radiation.

Please, have sense and do not go forward with Smart Water Meters. Save the elders, save the children and save the people in between the young and old! We need the chance to live! Clean water is health\*. Damaged water is illness. Damaged water will harm the citizens of this county. **Do not risk the health and well-being of the community** in favor of big tech.

If you go forward with opting into Smart Water Meters, you will carry this liability on your Soul. Since many of you are not young chickens, be mindful of protecting those generations that come after you.

Sincerely,

Celosia Arcadia
