Subject: Not so smart meters
Date: Tuesday, February 15, 2022 5:32:07 PM

I am 100% against installing new 'smart' water meters. The meters that are currently being used do the job without the cost of installing new ones.

I really do not need to know my moment to moment water usage.

Use the 2.2 million dollars to repair streets or simply keep in reserve for unforeseen needs in the future.
