Subject: no on water meters
Date: Tuesday, February 15, 2022 3:47:41 PM

“To the Mayor and City Councilmembers.”

**Dear Mayor and City Councilmembers,
I am opposed to going forward with the plan to install new water meters for residences especially at Burbank Heights, a community of elders.
The bad health effects that are caused by the EMFs that are emitted are well known to many of us.**

EMF sensitivity is a defined and listed disability with Americans with Disabilities Act.

The City has promised to have healthy environmentally supportive laws enacted.

We’ve contributed to society for many years and we deserve better in our aging years than to suffer from the many problems coming from the EMFs, affecting: sleep, disturbed nerve function, heart rhythm, and mental function, to name a few!

Please stop this-- and not with an opt-out plan that will cost us money we don’t have!!!

**Dorothy Schwartzberg
