Subject: Smart Water Meters
Date: Friday, February 11, 2022 11:43:47 AM

Dear Sebastopol Mayor Slater and City Council members,

I wish for no one to have to pay in order to retain their existing water meter or to have a non-RF transmitting water installed. Adding further RF signals to our environment has likely long term adverse health impacts, and a requirement to pay to opt out of having a Smart Meter installed and pay an additional monthly fee for the privilege is like paying a criminal gang for "protection" so they won't hurt you. Please find another way to insure adequate funding for the water department.

Thank you,

Karl Frederick

Sebastopol
