Subject: NO "smart" water meters!
Date: Friday, October 15, 2021 5:30:46 PM

Dear City of Sebastopol Council Members,

I am writing to oppose your proposal of installing "smart" aka wireless water meters in Sebastopol. Many people are suffering from the negative biological effects of wireless technology. Many of us have decided to exclude wireless technology from our properties. We use WIRED connections for our computers, which are faster, more reliable in bad weather, more cyber secure, more energy efficient, and SAFER in terms of toxic radiation. Do not IMPOSE this personal health hardship on us! It probably costs PG&E more to install hard technology vs this "smart" meter technology. We should not have to bear the financial brunt for PG&E.

Sincerely,
Jennifer LaPorta
