Subject: Opposition to Smart Meters on our Water Meters
Date: Tuesday, October 19, 2021 12:16:19 PM

Dear Sebastopol City Council:

Please reject this insane proposal to attach radiation emitting technology to our water meters. RADIATION KILLS and we should never allow radiation emitting devices anywhere near our water meters, just like we banned them on our electric meters. When will you ever learn that RADIATION KILLS? We, the People, have spoken and we will never tolerate such dangerous and deadly technology in our city. Such a proposal violates Sebastopol's Nuclear Free Zone law and will be punished to the fullest extent of the law. This is not a threat, but it is a promise. We, the People, keep our promises.

If any of you are seriously interested in learning more about this subject, please obtain the book RADIATION AND HUMAN HEALTH, by Dr. John Gofman.

Love,

Alan Horn
