

## **AI 4 : Garbage Franchise Ad Hoc Committee Recommendation**

Thank you to our city staff and the council ad hoc committee for all their hard work on this, and for putting together a document that explains historical context and the rationale and methods for fighting to get the best deal on behalf our increasingly financially hard pressed city citizens.

It is refreshing to see time and energy being put into finding long term practical solutions to city problems.

I agree with the recommendation that a hauling services RFP exploration is the most effective, although legally complicated, way to strive to find the most affordable future standard of service.

Much appreciated.
