Council,

It would be helpful to the citizens of Sebastopol to have a more functional agenda. Many meetings have important issues that should be discussed at the beginning of the meeting but are down the list so far as to make them timed out.

One of the most important decisions that will be made this year is the fire consolidation and it should be at the very top. Look at the agenda and see what is above that issue. This is reminiscent of the Congress of the United States!

Mary Cone
