I do not support the request for a salary raise. What is the current salary and when was the last raise? With the city in such financial limitations it is an inappropriate request at this point in time.

I also question the time and money spent on the proposed resurrected bike path that will dissect the Burbank Farm!

I would prefer to see the City correct their poorly planned storm drainage system, where you expect private citizens to be responsible for the drainage of a public street onto private property. I have been dealing with this issue for over 40 years!!! There have been about four instances where my house almost flooded. Unacceptable!!
